

**Medical safety
and testing requirements.**

1. Due to the ongoing pandemic, each person participating in the Competition (“YOUNG CAR MECHANIC 2021”) shall be tested negative for Covid-19.
2. The test must be taken at least 48 hours before entering the hotel or Competition venue. The time counts from the time the sample was taken.
3. The test result must be translated into English.
4. The obligation might not apply to: vaccinated people (14 days after the last dose of vaccine authorised in the EU); recovered people (28 days - 6 months after the disease). Such must be sufficiently proven by the person (it is up to the Organiser’s discretion if it finds the proof sufficient and releases the person from the obligation).
5. The Organiser will make a Covid-19 test available to each person who participated in the Competition, on their departure (after the Competition) if the rules of the participant’s entry country require the result of such a test to be shown.

The failure to comply with the above authorise the Organiser to exclude the person from their participation in the Competition.
